

Write Protect Card Reader

Write Protect Card Reader allows for a forensically safe transfer of data to a PC from flash media used by digital cameras, digital camcorder, PDA, MP3 player, digital voice recorder and more. It can read multiple types of flash memory while blocking any writes to it. A small palm-size package, simple USB 2.0/1.1 connection, no external power requirement makes this an attractive choice for any on-site forensic data acquisition or analysis application.

Features:

- High Speed USB 2.0 connection
- Backward compatible to USB 1.1
- Complete Plug and Play Read 12 different popular digital media - CF-I, CF-II, Smart Media™, Memory Stick™, Memory Stick PRO™, Memory Stick DUO™, Memory Stick PRO DUO™, Micro Drive™, Multimedia Card™, Secure Digital Card™, MINI Secure Digital Card™, XD™card (using optional CF adapter)
- Can read data among four different media simultaneously
- Maximum data throughput up to 480 Mbits/sec with USB 2.0 connection
- Unique icon for each media type under My Computer folder
- Size small enough to fit in most jacket pockets
- Bus powered - no AC adapter needed
